Profit by quality

A close-up photograph of a modern, stainless steel railing system. The railing is composed of two parallel cylindrical bars. A vertical support post connects the two bars, and a horizontal handgrip is attached to the lower bar. The handgrip has a circular end cap. The railing is mounted on a wall with a circular base plate. The lighting is bright, creating strong reflections on the polished metal surfaces.

## SB-LED

SB-LED is an innovation from SB-Railing. Stainless steel railings in several shapes and sizes containing very easy to install LED lighting. Durability, aesthetic design and simplicity are the key points of this innovative system.

SB-LED is a complete system with a variety of articles for LED handrails and railings. You can choose from various LED variants and different tube shapes and sizes. You choose what suits you best. The smart design of SB-LED railings and fences creates energy efficient light lines that are applicable in every project. Depending on the situation you choose a specific solution: balustrade or railing, for indoor or outdoor use.

An SB-LED railing or fencing creates considerable added value for your project!

### **Safe and durable**

Add lightning to a railing or balustrade for extra safety. An SB-LED handrail consists of sustainable materials and energy efficient LED lighting.

### **Attractive and functional**

Create atmospheric, architectural lines of light with an SB-LED railing or balustrade. Or use the handrail as functional lighting.

### **Indoors and outdoors**

SB-LED provides a handrail lighting system for every application, indoors or outdoors. Choose from a range of tube shapes and diameters and various illuminance levels and colors.

### **Benefits SB-LED**

- Fast and easy assembly
- Different tube sizes and shapes available
- Large variety of LED strips
- Handrail brackets adjustable at all times

## **STAINLESS STEEL SYSTEM WITH LED LIGHTING IN HANDRAIL AND BALUSTRADE**

More often clients and designers of building projects ask for attractive and functional light lines with sustainable LED lighting. LED lighting offers many possibilities for creative applications. The light lines can even, depending on the lighting requirements, replace the regular lighting.

## **RED DOT AWARD**

This innovative LED system has won the Red Dot Award in 2015. About 17,000 companies from 70 countries sign up for the design award each year. Innovation and high design quality are the most important criteria for the Red Dot jury.

Suitable for tube sizes rd 42,4 / 48,3 / and sq 40x40 / 60x40 mm

## Applications

The use of adequate lighting, indoors or outdoors, is necessary at stairs, walkways and ramps. Appropriate lighting is the key to a solid design and safe environment for its users. SB-LED creates an extra function for the railing or balustrade: full integration of LED light transforms it into a functional design fixture. Suitable for applications with:

- Offices
- Restaurants, theatres and cinemas
- Train and subway stations
- Airports
- Shopping centers
- Parkings
- Pedestrian areas
- Hospitals and nursing centers

## Why SB-LED?

- Handrail and light handy combined
- Continuous light lines
- Safe lighting for indoor or outdoor treads
- Choice in shape, light intensity and color
- Applicable as wall handrail or balustrade
- Sustainable LED lighting and materials
- Easy assembly
